at 10:29 a. m. Times of the tide are taken from the vey tables.

The tides at Kahului and Hilo occur about one hour earlier than at Honolulu. Hawaiian standard time is 10 hours 30 minutes slower than Greenwich time, being that of the meridian of 157 degrees 30 minutes. The time whistle blows at 1:30 p. m., which is the same as Greenwich, 9 hours 0 minutes. Sun and moon are for local time for the whole group.

### ci co, June 17. ALUMINUM WIRE.

There are three separate transmission circuits from the Niagara power house to Buffalo, two of which are copper, and installed on the same pole line. The third circuit is strung on a separate pole line throughout its entire length, and is of aluminum instead of copper. This aluminum line has the same resistance as each of the other two, and WILLARD E. BROWN. FRANK HALSTEAD is composed of three cables, of 500,000 circular mils each, made up of thirtyseven strands. At the present market price of copper wire it is cheaper to use aluminum for overhead wires The United States collier Hannibal where the conductors do not have to be has arrived at Lambert's Point, Mary- insulated. The conductivity of alumiland, and is receiving a cargo of fuel num is less than copper, and the price for transportation to a foreign station per pound is greater, but the volume without delay. The department has per pound of aluminum is much greater in view the stocking of several imporin view the stocking of several important points with coal, with reference to the needs of the future, and the Hannibal will be retained for this duty until the requirements of the service have been attended to in all parts of the world.

per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal When, therefore, resistance per pound to the metal when, therefore, resistance per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when, therefore, resistance per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when, therefore, resistance per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when, therefore, resistance per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when, therefore, resistance per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when, therefore, resistance per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when the proposition of the service of the service per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal when the proposition of the service per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal lower specific gravity of the metal when the proposition of the service per pound of aluminum is much greater than that of copper, on account of the lower specific gravity of the metal lower speci
